# INHALT

# EINLEITUNG

Sämtliche in dieser Bibliographie benutzten Schlagworte sind nach ihrer sachlichen Eindeutigkeit und fallweise auch besonderen Gebräuchlichkeit ausgewählt. In Zweifelsfällen sind wissenschaftliche Gesichtspunkte stets vorangestellt. Synonyme Schlagworte sind dem gültigen Terminus unter- bzw. eingeordnet; sofern notwendig, sind Verweisungen gesetzt. Homonyme Schlagworte sind sachlich entsprechend aufgeteilt und mit Zusätzen versehen worden, z. B. *Bruch* in: *Bruch (Fraktur), Bruch (Hernie), Bruch (jagdl.), Bruch (Landschaft), Bruch (math.), Bruch (techn.) usw.* Ähnlich sind inhaltlich sehr umfangreiche Begriffe unterteilt worden, z. B. *Arbeit* in die Schlagworte: *Arbeit* (sensu stricto) über *Arbeiter, Arbeiterbewegung* usw. usw. bis *Arbeitszeitermittlung.*

In der Medizin sind allgemein gehaltene Aufsätze über ein Organ gewöhnlich unter dessen deutschen Namen eingeordnet; in unklaren Fällen ist die wissenschaftliche Bezeichnung vorgezogen. Handelt es sich um die Erkrankungsform eines Organes, so ist der Titel unter dem Schlagwort der Krankheit zu suchen. Ist von der Erkrankung eines Organes im Zusammenhang mit einer speziellen Behandlungsmethode oder einem bestimmten Heilmittel die Rede, so ist je nach dem Tenor des Titels zunächst der Name der Behandlungsart oder des Medikamentes nachzuschlagen. Gewöhnlich sind derartige Fälle durch entsprechende Verweisungen erleichtert.

In der Biologie (Zoologie, Botanik, Paläontologie) wird in der Regel der geltende wissenschaftliche Gattungsname - im Bedarfsfalle unter Zusatz des Species-Namens - als Schlagwort verwendet, somit also der engere Begriff dem weiteren (und mehr oder minder abstrakten) vorgezogen. Zum Beispiel ist eine Publikation über den *Buchfinken* nicht unter diesem oder irgend einem Trivialnamen des Vogels zu finden, sondern unter dessen wissenschaftlicher Gattungsbezeichnung *Fringilla;* entsprechend eine solche über den *Gänsefuss* unter *Chenopodium.* Arbeiten über Finkenvögel bzw. über Gänsefussgewächse sind demgemäss unter *Fringillidae* bzw. unter *Chenopodiaceae* zu suchen. Ausgenommen sind allein Haus- bzw. Nutztiere und Wirtschaftspflanzen, die unter ihren gebräuchlichen (Handels-) Namen eingeordnet sind, sofern sie nicht vom ausgesprochen wissenschaftlichen Standpunkt aus behandelt sind.

In analoger Weise sind Pharmazeutica, Drogen usw. unter ihren Markennamen, die sonstigen chemischen Verbindungen nach ihrer bestimmenden strukturellen Zugehörigkeit oder nach allgemeiner bekannten Bezeichnungen bzw. hervortretenden Eigenschaften aufgeführt.

Ein Titel "Le salon de l'auto à Paris" wird unter *Automobilausstellung* zu suchen sein; gegebenenfalls sind hierher gehörige weitere Schlagworte (z. B. *Anhänger, Autobus, Kraftfahr-, Lastwagen* usw.) nachzusehen. Ähnlich verhält es sich z. B. mit dem Stichwort *Ausfuhr.* Handelt es sich um allgemeine Exportfragen, so sind hierhergehörige Titel unter dem Schlagwort Ausfuhr zusammengestellt. Befasst sich hingegen ein Aufsatz mit der Ausfuhr englischer Kohle nach Portugal, so ist an erster Stelle unter *Kohle* nachzusehen, befasst er sich speziell mit der britischen Ausfuhr nach Brasilien, so ist unter *England* oder *Brasilien* nachzuschlagen. Bei Beziehungen, Einflüssen oder Wirkungen steht nach Möglichkeit das Wirkende voran. Deshalb ist ein Titel "Adrenocorticotropic hormone (ACTH) in rheumatic arthritis" unter *ACTH* eingeordnet, während bei dem Schlagwort *Arthritis* auf *ACTH* verwiesen ist. Diesen bewährten Grundsätzen entsprechend können gegebenenfalls nur zufällige Titelformulierungen nicht für die Schlagwort-Bestimmung massgeblich sein.

Im allgemeinen sind nur Originalbeiträge, Mitteilungen und Sammelreferate bzw. bibliographische Übersichten berücksichtigt worden. Gelegentlich war eine gewisse Auswahl, die das Wesentliche vom Unbedeutenden bzw. ganz Vorübergehenden zu scheiden sucht, im Interesse der sachlichen Brauchbarkeit nicht zu vermeiden. Wie stets ist der Herausgeber für jeden Hinweis auf Druckfehler, Unrichtigkeiten oder auf Periodica, deren Aufnahme künftig wünschenswert erscheint, sehr dankbar.

## AVANT-PROPOS

Les mots propres suivants employés de la langue allemande ont été choisis selon leur clarté objective et, cas échéant, selon leur usage spécial. Dans des cas douteux, des points de vue scientifiques précèdent. Des mots synonymes ont été sous-classés ou mis au même rang du mot valable; en tant que nécessaire, il y a des renvois. Des mots homonymes ont été divisés respectivement selon leur objectif et munis de suppléments, p.ex., *Bruch*, en: *Bruch (fracture)*, *Bruch (hernie)*, *Bruch (en matière de chasse)*, *Bruch (paysage)*, *Bruch (math.)*, *Bruch (technique)*, etc. Des sujets très volumineux quant à leur contenu ont été sous-divisés d'une façon semblable, partant p.ex. du mot *Arbeit* (travail) sensu stricto, passant par *Arbeiter* (ouvrier, travailleur), *Arbeiterbewegung* (mouvement ouvrier), etc., allant jusqu'à *Arbeitszeitermittlung* (études sur la durée du travail).

Dans la médecine, des articles généraux sur un organe sont ordinairement classés sous le mot allemand de l'organe; dans des cas douteux, on a préféré la désignation scientifique. S'il s'agit de la forme de maladie d'un organe, le titre doit être cherché sous le mot de la maladie même. S'il est question de la maladie d'un organe en rapport avec une méthode spéciale de traitement ou d'un certain remède, on doit chercher d'abord, selon le teneur du titre, le nom de la manière du traitement ou celui du remède. En général, de tels cas ont été rendus plus faciles par des renvois respectifs.

Dans la biologie (zoologie, botanique, paléontologie), on a préféré, en général le mot du nom générique scientifique en vigueur (en ajoutant, au besoin, le nom d'espèce), donc le mot dans son sens plus étroit, au mot dans son sens plus large (et, par conséquent, plus ou moins abstrait).

Un article sur le *Buchfink* (pinson), p.ex., ne se trouvera pas sous ce nom ou sous un nom trivial quelconque de l'oiseau, mais bien sous sa désignation scientifique du genre *Fringilla*. Le même cas se présente pour un article sur le *Gänsefuss* (l'ansérine), sous *Chenopodium*. Pour ces raisons, des articles sur les pinsons ou les plantes du *Gänsefuss* seront à chercher sous *Fringillidae* ou *Chenopodiaceae*. Seules font exception à cette règle les articles sur les animaux domestiques et d'utilité et sur les plantes d'économie, classés sous leurs noms ordinaires (de commerce), s'ils ne sont pas traités du point de vue essentiellement scientifique.

D'une manière analogue sont énumérées les pharmaceutica, drogues, etc., c.à d. sous leurs noms de marque, tandis que les autres combinaisons chimiques sont classées selon leur appartenance décisive structurelle ou leurs désignations plus connues et leurs propriétés visibles respectivement.

Un titre comme „Le salon de l'auto à Paris" devra être cherché sous *Automobilausstellung;* cas échéant, d'autres mots y appartenant devront être cherchés, p.ex. *Anhänger* (remorque), *Autobus*, *Kraftfahr-*, *Lastwagen* (autobus, automobile, camion). De la même façon se traite le mot *Ausfuhr* (exportation). S'il s'agit de questions générales d'exportation, des titres y relatifs ont été groupés sous le mot *Ausfuhr*, tandis que si, par contre, un article traite p.ex. l'exportation de charbon anglais au Portugal, il faudrait chercher en premier lieu sous *Kohle* (charbon). S'il s'agit d'un article visant spécialement l'exportation de charbon anglais au Brésil, il faudrait se référer à *England* (Angleterre) ou *Brasilien* (Brésil). Pour ce qui est des rapports, influences ou effets, l'effet précède, si possible. Pour cette raison, un titre "Adrenocorticotropic hormone (ACTH) in rheumatic arthritis" est classé sous *ACTH*, tandis que sous le mot *Arthritis*, il y a un renvoi à *ACTH*. D'après ces principes éprouvés, des formulations de titres simplement prises au hazard ne pourront pas, cas échéant, être décisives pour la détermination du mot propre.

En général, seulement des thèses originales, communications, et rapports collectifs ou revues bibliographiques ont été pris en considération. Occasionnellement, un certain choix qui cherche à séparer l'essentiel de l'insignifiant ou du transitoire est inévitable dans l'intérêt de l'utilité objective. Comme d'habitude, l'éditeur sera reconnaissant pour chaque communication lui indiquant des erreurs typographiques, des inexactitudes ou des périodiques dont l'insertion à l'avenir pourrait sembler désirable.

# INTRODUCTION

The catchwords in this bibliography have been chosen because of their essential unambiguity and in certain cases also because they are frequently used. In dubious cases scientific points have received priority. Synonyms have been subordinated to the current term or classified under it, if necessary cross references have been inserted. Homonyms have been subdivided according to their literal meaning, and additional explanations have been supplied, e. g. Bruch in: *Bruch (fracture), Bruch (hernia, rupture), Bruch (a term used in hunting), Bruch (landscape), Bruch (math.), Bruch (technical)* etc. Terms which admit a very wide interpretation have been subdivided in a similar way, e. g. *Arbeit* (work) into the terms: *Arbeit* (sensu stricto) through *Arbeiter* (labourer), *Arbeiterbewegung* (Labour movement) etc. down to *Arbeitszeitermittlung* (valuation of working time).

In medicine, general treatises on a certain organ are classified under its German name; in certain cases the scientific term has been given preference. The name of an illness is used as the catchword under which titles of essays will be found dealing with the form of that illness in a certain organ. If the illness of an organ and a special treatment or a certain remedy is made the subject of an essay, then the method of treatment or the remedy may be looked up by reference to the catchword of the title. Usually such cases are facilitated by adequate cross references.

In biology (zoology, botany, palaeontology) the appropriate scientific name - if necessary in addition to the name of the species - is, as a rule, used as title. Thus the restricted meaning is preferred to the broader (and more or less abstract) meaning. For example, a publication on the *Buchfink* (chaffinch) will not be found under this or any other trivial name of the bird, but under its generic name *Fringilla;* just as one about the "Goosefoot" *(Gänsefuss)* will be found under Chenopodium. Publications on finches or about goosefoot plants will, consequently, be looked up under *Fringillidae* or *Chenopodiaceae*. Excepted are all domestic and commercial animals and all commercial plants which are categorized under the customary commercial terms, as far as they are not treated from a distinct scientific point of view.

By analogy, pharmaceuticals, drugs, etc. are specified under their trade name, all other chemical compounds according to their dominating structural affiliations or according to generally known terms or outstanding characteristics.

A title "Le salon de l'auto à Paris" may be looked up under *Automobilausstellung;* if occasion arises, other names relating to this catchword *Anhänger, Autobus, Kraftfahr-, Lastwagen* usw. (trailer, bus, motoring, truck, etc.) may be looked up. The same applies for instance to the word *Ausfuhr* (export). All titles of essays dealing with general problems of export have been compiled under the term *Ausfuhr* (export). Whereas in any essay dealing with the export of British coal to Portugal, the title may be found under *Kohle* (coal) in the first place, and if the essay deals expressly with the British export to Brazil, the title may be found under *England* or *Brasilien*. In the case of connections, influence or effect, the effect - if possible - has been given preference. For this reason a title "Adrenocorticotropic hormone (ACTH) in rheumatic arthritis," has been inserted under *ACTH*, whereas the word *Arthritis* has been referred to *ACTH*. According to these approved principles only casual titles - if occasion arises - cannot be decisive in the definition of the keyterm.

On the whole only original essays and papers, pieces of information, and collective reports or bibliographic summaries have been given consideration. Occasionally a certain selection, which seeks to separate the essential from the insignificant or from the wholly temporary, could not be avoided in the interests of its essential usefulness. As usual the publisher will be very thankful for any information as to errata or incorrectness, or for any reference to periodicals which it may seem desirable to include in the future.

## BENUTZUNGSREGELN

Die **Schlagworte** (in halbfetter Schrift) sind in alphabetischer Reihenfolge - als durchgehendes Alphabet - geordnet. Die Umlaute ä, ö bzw. ø und ü gelten hierbei als ae, oe und ue. Die in eckigen Klammern [ ] den Schlagworten folgenden Zusätze bedeuten eine nähere Kennzeichnung, häufig im Sinne einer Unterteilung des Gebietes oder Begriffs.

Der dem Aufsatztitel in runden Klammern ( ) nachgesetzte Eigenname gibt den **Verfasser** an, fehlt er, so ist der Artikel entweder ohne oder mit gekürzter Verfasserangabe erschienen. Erworbene Titel sind bei Autorennamen weggelassen.

Nach dem Verfassernamen, bzw. wo dieser fehlt, nach dem Artikeltitel folgt in halbfetter Schrift die **Schlüsselzahl** der betreffenden Zeitschrift. Diese ist im Verzeichnis der Zeitschriften nachzuschlagen.

Innerhalb eines Schlagwortes sind die Titel in der Reihenfolge der Schlüsselzahlen geordnet und innerhalb dieser jeweils nach **Band-, Heft- und Seitenzahlen.**

Die **Verweisungen** (siehe auch . . . oder s. a. . . .) befinden sich fallsweise am Schluss des Schlagwortes. Sie benennen ein oder mehrere Schlagworte, unter denen weiteres Material über das gleiche Interessengebiet eingeordnet ist.

Am Schluss des Bandes sind sämtliche Autoren im alphabetischen **Verfasserregister** (mit Angabe der jeweiligen Schlagworte, unter denen ihre Veröffentlichungen eingeordnet sind) aufgeführt. Auch hierbei sind die Umlaute ä, ö bzw. ø und ü als ae, oe und ue gewertet worden.

# VERZEICHNIS DER ZEITSCHRIFTEN

Das nachstehende Verzeichnis führt wiederum etwa 4000 Zeitschriften, Berichte, Mitteilungen, Jahrbücher, Ab- und Verhandlungen wissenschaftlicher Gesellschaften und Institute sowie sonstige periodische Veröffentlichungen auf, die für die Abteilung B: „Bibliographie der fremdsprachigen Zeitschriftenliteratur" zur Zeit ausgewählt und in laufende Bearbeitung genommen worden sind. Der weitaus grösste Teil davon ist im hier vorliegenden Bande bereits berücksichtigt; der Rest wird ehestens nachkommen. In Anbetracht der teilweise noch bestehenden Beschaffungsschwierigkeiten kann für Vollständigkeit in der Erfassung einzelner Hefte bzw. Lieferungen keine Gewähr übernommen werden; dass die baldige Schliessung noch vorhandener Lücken angestrebt wird, ist selbstverständlich.

Die Titel der Periodica sind rein mechanisch in der alphabetischen Reihenfolge geordnet worden, wobei vorgesetzte Artikel (Le, La, Un, The etc.) und uneinheitlich gehaltene Attribute (K., Kon., Kgl., Kungl., Kongelike, Kuninklijke, R., Reale, Royal) unberücksichtigt geblieben sind.

Sämtliche Zeitschriften dieses Verzeichnisses sind mit einer Kennziffer versehen. Im bibliographischen Textteil dient diese, in halbfettem Schriftsatz hinter dem Titel der jeweiligen Mitteilung, bzw. des Aufsatzes stehend, als Schlüsselzahl für das Auffinden der als Veröffentlichungsquelle in Frage kommenden Zeitschrift. Verwechslungen mit deutschsprachigen Zeitschriften der Abteilung A sind insofern unmöglich, als sich deren Schlüsselzahlen zwischen 1 und 19 999 bewegen, während die fremdsprachigen Periodica unter den Kennziffern 20 000 bis 40 000 eingeordnet sind.
